Those of you who have followed Healing Warriors Program since opening our doors in July 2013 with one treatment room will be gratified to see how far we have come in these five years. Last October, we crossed a pivotal milestone having delivered over 10,000 treatment sessions to service members and their families since opening our doors. The veterans that come in to the Healing Warriors Program clinic are oftentimes here as a last resort. Some have been enduring severe chronic pain for years. If we can relieve pain and extend that relief for increasing periods of time, we begin to once again find that quality of life that for some, has proven elusive.

Thank you for joining us as a community and supporting our veterans, enabling the clinic to offer these much-needed services to our veterans and their families.
Demand for our services continues to rise and we are challenged by the need for funding to meet the need for services. Thank you for supporting our Service Members!

By tracking our client’s observations on pain, anxiety, and sleep disturbance, both the client and the practitioner can evaluate together if the treatment course is helping them or whether a change is necessary. The objective here is to work in partnership with the client on the care approach and wellness goals they want to achieve.

**OUR RESULTS**

In 2017, we achieved the milestone of 10,000 sessions delivered!

Demand for our services continues to rise and we are challenged by the need for funding to meet the need for services. Thank you for supporting our Service Members!

**FINANCIALS**

HWP completed an independent audit of our financial position and internal controls for our 2017 financials. The external auditor found no unexpected material weaknesses for an organization of HWP’s size and scope.
